- View and pay your bill
- Enroll in Auto Pay
- Check your account balance
- Receive emergency alerts
- Sign up for customer assistance
- Track your water use

- Resolutions

- Save water and money inside your home:

- Run dishwashers and clothes washers only when they are full. If you have a water-saver cycle, use it.
- Use low-flow showerheads and faucet aerators to reduce the flow of water without reducing pressure.
- Regularly check your toilet, faucets, and pipes for leaks. If you find a leak, have it fixed as soon as possible.

- Protect your pipes:

- Insulate pipes in unheated areas to prevent them from freezing. If pipes run through cabinets, open the doors to allow warmer room temps to flow in.
- When temperatures stay below freezing, allow a small trickle of water to run to help keep pipes from freezing.
- Check for leaks after the first thaw by having a plumber walk your property to inspect water lines.
