

Kentucky American Water's 2023 Water Quality Report Now Available Online

Reports Show Water Utility Continues to Meet or Surpass Water Quality Standards

Kentucky American Water announces that the company's 2023 Water Quality Reports are now available to customers on the company's website at www.kentuckyamwater.com.

Kentucky American Water continues to meet or surpass water quality standards. Also referred to as Consumer Confidence Reports, the publications describe local drinking water sources, summarize laboratory testing conducted on water, list the levels of any substances contained in the water and provide tips on protecting water sources.

The U.S. Environmental Protection Agency (U.S. EPA) and the Kentucky Division of Water set standards for water quality and monitor test results to help utilities meet those standards.

"Our employees are committed to providing high-quality water because we know that customers count on us to provide clean, safe and reliable water service," said Bob Money, senior manager of water quality and environmental compliance for Kentucky American Water. "We're particularly proud that all three of our water treatment plants have been nationally recognized with Directors Awards from the U.S. EPA's Partnership for Safe Water program for our long-term commitment to optimizing operations, achieving outstanding performance, and protecting public health and the environment.

"The annual water quality report is a great resource for learning more about your tap water and the important work that goes into treatment to meet or even exceed regulatory requirements," Money added.

Kentucky American Water reports are available on the company's website at <https://www.amwater.com/kyaw/Water-Quality/Water-Quality-Reports/>.
