Pennsylvania American Water Begins $1.1 Million Water Line Upgrades in Hanover Township

SCRANTON, Pa. (March 24, 2025) – Pennsylvania American Water today announced the start of a $1.1 million upgrade project to replace more than 4,000 feet of water main in Hanover Township to improve reliability for customers, reduce service disruptions and increase water flows for firefighting. The system improvements replace water main dating back to 1905.

The project, which started earlier this month, involves company contractors installing new eight-inch ductile iron pipe, replacing smaller diameter water main in following areas:

- Oaklawn Ave. (from S. Main Ave. to East St. Mary Road)
- Newport St. (from Brown St. to Hazle St.)
- Newport St. (from Hazle St. to Charles St.)

Additionally, the company is installing new pipe along Marcy Court in Ashley Borough.

Crews will work weekdays between 7 a.m. and 5 p.m. Traffic restrictions will be in place during construction. The company expects to complete the water main installation, including connecting all customer service lines to the new mains, along with final restoration and paving later this summer.

During construction, customers might experience temporary service interruptions, discolored water and/or lower than normal water pressure. Crews will work as quickly as possible to shorten the length of these temporary inconveniences. For more information, contact Pennsylvania American Water's customer service center at 1-800-565-7292.

This infrastructure upgrade project is not only an important investment in public health and safety, it also helps support the economic health of the community. Economic impact studies show that for every $1 million invested in water infrastructure, upwards of 15 jobs are generated throughout the economy. Statewide, Pennsylvania American Water invested approximately $675 million in 2024 alone to improve our water and wastewater treatment and pipeline systems, supporting more than 10,125 jobs through these continued investments.
