

Water Quality Reports Available Online for Missouri American Water Customers

Reports show drinking water in all service areas meets quality standards

ST. LOUIS, MO. (June 10, 2025) – Missouri American Water’s most recent Water Quality Reports are now available for all service areas on its website at missouriamwater.com. The company is proud to report that once again, the drinking water provided to the 1.6 million customers across Missouri meets or surpasses both state and federal water quality standards for all regulated substances, including lead.

“At Missouri American Water, our mission is to provide safe, clean, reliable, and affordable water to our customers,” said Rich Svindland, President, Missouri American Water. “Our annual reports inform customers about their water quality and include details about their water, such as where the water is sourced from and the importance of protecting the watershed.”

The 2024 annual water quality report, also known as a “consumer confidence report,” details the quality of water the company provides to its customers using data collected from water quality testing in its local systems between January and December 2024.

It highlights the compounds detected in treated drinking water in comparison to the compliance standards established by the U.S. Environmental Protection Agency (EPA) and Missouri Department of Natural Resources (MoDNR).

To enhance education and transparency, the report also includes results of tests conducted on certain unregulated compounds in areas where they are present.

Svindland added “We take pride in the work our team does every day to deliver high-quality water. Our water quality reports are one more way we demonstrate our commitment to our customers.”

Customers can access the Water Quality report specific to their area by visiting the Water Quality tab on Missouri American Water’s website and searching for their report by zip code. Printed copies of the report are also available. Customers can request a printed copy of the report by calling our customer service center at 866-430-0820 to request a hard copy of their local report.
