American Water Newsroom

# New Jersey American Water Invests $2.9 Million in West Orange Infrastructure

New Jersey American Water will replace approximately 4,900 feet of aging 6-inch cast iron water main in West Orange. The 1930s water main will be upgraded with new 12-inch and 16-inch ductile iron main along Eagle Rock Avenue-CR611, between Oval Road and Valley Way.

This $2.9 million investment will continue to advance water service reliability and increase water flows for household consumption and fire protection in this community. This improvement is part of New Jersey American Water's multimillion-dollar initiative to accelerate the renewal of water infrastructure that has reached the end of its useful life in more than 100 communities across the state.

New Jersey American Water's local, qualified contractor, J. Fletcher Creamer, Inc., began work on June 9 and is expected to be completed by the end of August 2025. Work hours will take place during the evening/overnight hours between 7:00 p.m. and 5:00 a.m., Monday through Friday. Work outside of these hours is not expected unless required to maintain project schedule. Final street restorations will take place in fall 2025.

Project timelines are subject to change due to a variety of factors including weather and availability of supplies. New Jersey American Water encourages customers to take a few moments to update their contact information and preferences in their MyWater account. Customers must opt in for general alerts to receive local main replacement and other non-emergency notifications via phone call, text or email. Individuals who are not New Jersey American Water account holders but would like to receive alerts and notifications from the company can also sign up by visiting awcodered.com or by texting WATER to 99411.

For the public's and workers' safety, traffic restrictions and/or alternating traffic patterns are likely to occur during work hours. All emergency vehicles and local traffic will be allowed access during construction. New Jersey American Water values the safety of its workers and advises drivers and pedestrians to take caution in the vicinity of work sites.
