West Virginia American Water President Scott Wyman Joins American Water Leadership to Meet with Congressional Leaders in Washington D.C.

Company discusses solutions to water and wastewater infrastructure challenges

Charleston, W.Va., – July 17, 2025 – West Virginia American Water President Scott Wyman joined a cohort of American Water state presidents and senior executives to meet with Members of Congress in Washington, D.C. this week. The group aimed to strengthen relationships with policymakers and discuss potential solutions to vital water and wastewater infrastructure needs across the nation.

Led by American Water President and Chief Executive Officer John Griffith and Executive Vice President and Chief Operating Officer Cheryl Norton, the engagements included representation from 11 states and more than 40 meetings with congressional offices. Key topics focused on policy issues that affect water utilities, investment in water and wastewater infrastructure, the future of clean water access and other key legislative priorities.

“This fly-in gave us a valuable opportunity to elevate the voices of our West Virginia customers and highlight policies to assist with the urgent need for continued investment in aging water systems across our communities,” said Scott Wyman, President of West Virginia American Water. “The infrastructure challenge across West Virginia will require a coordinated, statewide effort to help ensure resilient infrastructure for all West Virginians, and conversations like this help to bring that to the forefront.”

This year’s fly-in underscored the need for significant investment in water infrastructure, especially given the American Society of Civil Engineers’ (ASCE) 2025 Report Card for America’s Infrastructure. The nation's drinking water systems received a grade of “C-” and wastewater systems a grade of “D+,” highlighting the serious challenges facing U.S. water and wastewater utilities. American Water plans to invest $40–$42 billion over the next decade in infrastructure upgrades and repairs, including right here in West Virginia.
