

Illinois American Water Educates Customers on Utility Scams

Helpful Tips to Safeguard Against Utility Scammers In-Person and Online

Belleville, Ill – NOVEMBER 19, 2025 – [Illinois American Water](#) wants to keep customers and the general public safe on Utility Scam Awareness Day by providing valuable tips to help identify and avoid scammers from targeting unsuspecting utility customers.

“The safety of our customers and employees are a top priority at Illinois American Water customers. As utility scams continue to rise, it’s important that everyone exercises caution and takes steps to protect themselves by confirming the identity of workers before granting access to homes or businesses or sharing personal information,” said Rebecca Losli, president at Illinois American Water. “Illinois American Water employees always carry an ID badge and drive clearly marked vehicles, helping to ensure trust in service delivery. When receiving requests for personal information that seem suspicious, customers may use the phone number on our website to verify calls received.”

Utility company imposters often attempt to scam individuals in two main ways: 1) they may pose as utility workers to gain access to someone's home; 2) they might urgently contact the person, either by phone or another method, demanding immediate payment to prevent disruption in services.

Safeguard personal information from scammers by following these tips:

- **Always verify.** When unsure about an incoming phone call or email, stop the communication and verify with the utility company's customer service number to confirm legitimacy.
- **Be skeptical.** When receiving a phone call, text message, email, or visit from someone, be sure to ask questions and verify their identity before giving out any personal or financial information.
- **Remain calm.** Scammers often attempt to provoke a sense of urgency. If concerned, end the call or lock the door, and contact the utility company directly to verify.
- **Never give money.** Our employees and contractors never collect money or credit card information from customers in the field.
