West Virginia American Water Invests $1.2 Million in Stewart Road Infrastructure

Hurricane, W.Va., (February 11, 2026) – West Virginia American Water is pleased to announce a $1.2 million infrastructure project along Stewart Road near Hurricane.

“This is an important investment in our infrastructure along Stewart Road,” said **Scott Wyman, President of West Virginia American Water**. “We take pride in continuing to invest in our system and believe it is crucial to helping maintain safe, clean and reliable water for our customers.”

The project will take place along Stewart Road, off Route 60 near Hurricane, and includes replacing 2,000 feet of aging pipe with 6-inch PVC main. It is scheduled to be completed by the end of March, and the final street restoration will be completed in the fall of 2026. Crews will work Monday through Friday between 7:00 a.m. and 5:00 p.m., and traffic restrictions will be in place for the duration of the project.

This infrastructure upgrade project is part of West Virginia American Water’s plan to invest more than $129 million in infrastructure upgrades across the state in 2026, supporting the economic health of communities across the company’s service area. Economic impact studies show that for every $1 million invested in water infrastructure, upwards of 10 jobs are generated throughout local economies.

Over the past decade, West Virginia American Water has invested over $805 million in infrastructure projects and capital upgrades to address aging infrastructure across the Mountain State, including more than 168 miles of new water main. To learn more about these ongoing investments, visit the company’s interactive upgrade map.

During construction, customers may experience temporary service interruptions, discolored water, and/or lower than normal water pressure. Crews will work as quickly as possible to shorten the length of these temporary inconveniences. To report water related emergencies such as leaks, main breaks or other service disruptions, customers can submit a service request on the company’s website.
