Indiana American Water Announces More Than $246 Million Invested in 2025 Statewide Infrastructure Upgrades

Strengthening System Reliability and Water Quality for Customers

GREENWOOD, Ind., March 19, 2026 /PRNewswire/ -- Indiana American Water announced today its 2025 summary of investments for system improvements, totaling more than $246 million in water and wastewater system upgrades throughout its service area across the Hoosier State.

"Delivering safe, clean and reliable water and wastewater service requires consistent, proactive investment in our systems," said **Barry Suits, President, Indiana American Water.** "These investments are focused on strengthening reliability, modernizing aging infrastructure, and minimizing service disruptions for our customers across the state. By continuing to invest in our systems today, we are helping deliver resilient, high-quality service for the communities we serve well into the future."

Annual investments support critical upgrades throughout the company's water and wastewater systems, including treatment plants, tanks, pump stations, pipelines, and metering equipment.

- More than **$246 million in infrastructure investments** across Indiana American Water's 75 communities. These investments include new treatment plants, water mains, booster and lift stations, meters, pumps, fire hydrants, and technology enhancements. Major projects include:
    - $50 million water treatment plant in Seymour;
    - $27 million water treatment plant in Winchester;
    - $5.7 million booster station serving southern Indiana; and
    - The state's first PFAS treatment capability in Charlestown.
- A significant portion of these investments focus on **maintaining, relocating, and replacing water mains** and plant piping to ensure reliable water and wastewater service.
    - Fact: **Indiana American Water manages over 5,574 miles of mains**—*about the distance from Indianapolis to Honolulu, twice.*
- These upgrades also include efforts to identify and **remove lead service lines**. In 2026, the company will invest $19 million to continue "getting the lead out" of communities.

As part of Indiana American Water's Comprehensive Planning Studies, these efforts help guide long-term, proactive capital investments that modernize aging infrastructure, strengthen system reliability, and ensure high-quality water and wastewater service for customers.
