

Maryland American Water Celebrates Earth Day by Sharing Water Saving Tips

Simple Ways to Make Every Day Earth Day

BEL AIR, Md., April 20, 2026 /PRNewswire/ -- In recognition of Earth Day, Maryland American Water is highlighting the [importance of protecting local water resources through environmental stewardship, strategic infrastructure investment, and community engagement](#).

Serving approximately 24,000 customers in Maryland, the company works year-round to protect water at its source while delivering safe, reliable service to homes and businesses across the state.

"Protecting water starts long before it reaches the tap," said **Thalika Hollingsworth, Source Water Protection Manager, Maryland American Water**. "By safeguarding streams, reservoirs and aquifers that supply our drinking water like Winters Run, Mount Soma reservoir, and the Lower Patapsco aquifer, our employees are committed every day to strengthening infrastructure and supporting the communities we serve."

Maryland American Water also encourages customers to take simple steps at home that help conserve water and protect this vital resource, including fixing leaks, turning off the tap while brushing teeth, running full loads of laundry and dishes, and properly disposing of household items like batteries, paint, and unused medications.

Hollingsworth added, "Small actions can make a big difference. When utilities, communities and customers work together to protect water resources, we help ensure clean, reliable water for future generations."

For more Earth Day information and resources, visit the U.S. Environmental Protection Agency Earth Day website: epa.gov/earthday.

This Saturday, April 25, is also National Prescription Drug Take Back Day, organized by the U.S. Drug Enforcement Administration. Unneeded medications can be safely disposed of at official drop-off locations across the state from 10:00 AM to 2:00 PM. Find local drop-off locations and more information at dea.gov/takebackday.
