

Missouri American Water Marks Drinking Water Week with Focus on Safe, Reliable Water

ST. LOUIS, May 4, 2026 /PRNewswire/ -- /PRNewswire/ -- Missouri American Water celebrates Drinking Water Week (May 3-9, 2026), reaffirming its commitment to [providing safe, reliable water to 1.7 million customers throughout the state](#).

An annual observance led by the American Water Works Association (AWWA) during the first full week of May, Drinking Water Week brings together water utilities and communities across North America to recognize the importance of high-quality drinking water in protecting public health, supporting economic growth and sustaining everyday life.

"Providing safe, reliable water is at the core of what we do," said **Rich Svindland, President of Missouri American Water**. "We are focused on maintaining strong systems today, while continuing to invest in the infrastructure needed to serve our communities every day and into the future."

Missouri American Water continues to invest in its local systems to focus on the people who rely on them every day, strengthening reliability, enhancing water quality and supporting long-term resilience. These investments—ranging from upgrading treatment facilities to replacing aging infrastructure and advancing new technologies—help ensure that about 1.7 million customers across the state can trust water in their homes and communities.

From 2023 to 2025, Missouri American Water [invested about \\$1.1 billion in water and wastewater infrastructure across the state](#), including the replacement of over 250 miles of aging water and wastewater pipes, all aimed at delivering safe, consistent service that customers can depend on.

Missouri American Water encourages customers to take an active role in water stewardship by:

- Learning more about their local water systems.
- Taking steps to help protect vital water resources.
- Recognizing the essential role water plays in sustaining healthy communities.

Missouri American Water customers can find more information on their water quality by zip code at <https://www.amwater.com/moaw/Water-Quality/Water-Quality-Reports/>.
