

Pennsylvania American Water Announces Major Water Tank Upgrades Statewide

\$17.8 million in upgrades to support reliable water service, strong pressure and safe, high-quality water

MECHANICSBURG, Pa., May 18, 2026 /PRNewswire/ -- In conjunction with the start of the annual [Infrastructure Week](#) observation, [Pennsylvania American Water](#) today announced its 2026 storage tank improvement plan, a series of upgrades designed to help ensure reliable service, consistent water pressure and continued protection of water quality for customers across the Commonwealth.

The plan includes the rehabilitation of seven existing water storage tanks and construction of two new tanks, representing approximately \$17.8 million in system improvements this year. These upgrades are designed to support reliable service, maintain consistent water pressure and strengthen fire protection. They also help protect water quality and extend the life of critical infrastructure.

"Water storage tanks play a key role in delivering the service our customers depend on every day," said Tony Nokovich, vice president of engineering at Pennsylvania American Water. "These improvements help maintain consistent pressure, support fire protection and ensure we can meet customer demand – both today and into the future."

Tank rehabilitation work includes inspecting, sandblasting and recoating tanks to protect them from corrosion and maintain water quality. These proactive upgrades extend the life of existing infrastructure and help avoid more costly replacements. Customers are not expected to experience service interruptions during this work.

This year, the company will rehabilitate and repaint seven storage tanks:

County	Municipality	Cost	Size (gal)
Butler	Saxonburg Borough	\$416,300	250,000
Lackawanna	Waverly Township	\$332,200	500,000
Lancaster	Bart Township	\$728,000	2,000,000
Monroe	Coolbaugh Township	\$291,000	100,000
Monroe	Hamilton Township	\$379,100	500,000
Union	East Buffalo Township	\$700,000	1,000,000
Washington	North Franklin Township	\$1,030,200	2,000,000

The company is also constructing two new water storage tanks to provide additional water storage capacity, which will help the company continue to deliver reliable water service to meet customer demand and provide fire protection.

County	Municipality	Cost	Size (gal)
Dauphin	Derry Township	\$8,000,000	2,000,000
Northampton	Palmer Township	\$6,000,000	500,000

These infrastructure projects are not only an important investment in public health and safety, they also help support the economic vitality of the community. Research shows that for every \$1 million invested in water infrastructure, upwards of 10 jobs are generated throughout the economy. Statewide, Pennsylvania American Water invested approximately \$722 million in 2025 alone to improve its water and wastewater treatment and pipeline systems, supporting more than 7,220 jobs. The company's 2026 tank rehabilitation and construction projects will support more than 178 jobs.
