

Maryland American Water Urges Customers to Reduce Nonessential Water Use in Response to Drought Conditions

Calls for Voluntary Commonsense Water Reduction by Residential Customers

BEL AIR, Md., July 27, 2026 /[PRNewswire](#)/ -- Maryland American Water is asking residential customers to voluntarily reduce their water consumption in response to the Maryland Department of the Environment's recent drought watch advisories.

According to the [U.S. Drought Monitor](#), despite precipitation, Maryland is still experiencing varying levels drought conditions, with all of Maryland American Water's service territory under a drought watch.

"The lack of precipitation and increased water demand in the hot summer months has impacted source water levels," said Charles Piekanski, Vice President of Maryland American Water. "We're asking our residential customers to voluntarily reduce non-essential water use in an effort to avoid additional restrictions."

These voluntary conservation measures are not directed toward businesses or industries, only toward residential non-essential usage and only during the period that the drought continues.

"Small changes in daily habits and simple water reduction measures can make a difference," added Piekanski.

Below are tips for conserving water inside and outside the home:

Outside

- Water your lawn and garden on alternating days. When you do, water in the early morning or evening to reduce evaporation.
- Turn off ornamental fountains.
- Limit washing of vehicles, boats, trailers and paved surfaces.
- Limit filling and topping off your swimming pools.

Inside

- Run dishwashers and clothes washers only when they are full. If you have a water-saver cycle, use it.
- Regularly check your toilet, faucets, and pipes for leaks with our [free leak detection resources](#). If you find a leak, have it fixed as soon as possible.
- Install water-saving showerheads, toilets and faucet aerators.
- Consider water and energy-efficient appliances. Products and services that have earned the WaterSense label have been certified to be at least 20% more efficient while maintaining performance.
- Turn off the tap while brushing your teeth or washing dishes in the sink.
