

Tennessee American Water Provides Additional PFAS Settlement Credit to Customers

Latest credit of nearly \$12 brings total PFAS settlement proceeds to more than \$71 per customer

CHATTANOOGA, Tenn., Aug. 31, 2026 /[PRNewswire](#)/ -- Tennessee American Water announced that they are applying additional credits to customers' bills as a result of the company's receipt of proceeds from settlements reached with manufacturers of per- and polyfluoroalkyl substances (PFAS).

Today, Tennessee American Water issued an \$11.92 bill credit to all active water customer accounts as of August 28, 2026. The credit distributes recent settlement proceeds the company received from PFAS manufacturers to customers.

The Tennessee Public Utility Commission approved a plan that enables Tennessee American Water to provide PFAS settlement funds directly to customers through bill credits as the funds are received. Including this latest credit, customers have received a total of over \$71 per account from PFAS-related settlements to date. Tennessee American Water issued a credit of \$59.36 to customers in March of this year to all active accounts at that time.

The company is committed to complying with all drinking water standards and is taking appropriate actions to meet new PFAS regulations as they are implemented. Tennessee American Water is investing over \$45 million in capital improvements across their service territories to continue providing safe, clean, reliable and affordable water service. For more information about PFAS and the steps Tennessee American Water is taking to address them, visit the company's [PFAS information page](#).
