

West Virginia American Water Announces \$900,000 Infrastructure Project in Charleston

CHARLESTON, W. Va., Sept. 1, 2026 /PRNewswire/ -- West Virginia American Water is pleased to announce a \$900,000 infrastructure upgrade project on Autumn Road in Charleston.

"At West Virginia American Water, we believe the best way to maintain a strong, reliable water system is through continued, proactive investment," said **Scott Wyman, President of West Virginia American Water**. "By making strategic infrastructure improvements today, we can help reduce future disruptions, improve service reliability for our customers, and maintain our quality standards."

The project will take place on Autumn Road, from the Autumn Road and Clark Road intersection to the Autumn Road and Loma Road intersection. Crews will replace 2,000 feet of aging pipe with 6-inch PVC main. It is scheduled to be completed by the end of November, and the final street restoration will be completed in the spring of 2027. Work will occur Monday through Thursday between 7:00 a.m. and 5:00 p.m., and traffic restrictions will be in place for the duration of the project.

This infrastructure upgrade project is part of West Virginia American Water's plan to invest more than \$129 million in ongoing infrastructure upgrades across the state in 2026, supporting the economic health of communities across the company's service area. Economic impact studies show that for every \$1 million invested in water infrastructure, upwards of 10 jobs are generated throughout local economies.

Over the past decade, West Virginia American Water has invested over \$805 million in infrastructure projects and capital upgrades to address aging infrastructure across the Mountain State, including more than 168 miles of new water main. To learn more about these ongoing investments, [visit the company's interactive upgrade map](#).

During construction, customers may experience temporary service interruptions, discolored water, and/or lower than normal water pressure. Crews will work as quickly as possible to shorten the length of these temporary inconveniences. To report water related emergencies such as leaks, main breaks or other service disruptions, [customers can submit a service request on the company's website](#).
