West Virginia American Water Announces $580,000 Infrastructure Upgrades in Oak Hill

OAK HILL, W.Va., Nov. 12, 2026 /PRNewswire/ -- West Virginia American Water is pleased to announce a $580,000 water infrastructure upgrade project on Wilson Street and Harper Street in Oak Hill.

"This project on Wilson and Harper Streets in Oak Hill works to continue our proactive infrastructure replacement strategy", said **Scott Wyman, President of West Virginia American Water.** "Projects like this help maintain system resiliency, which in turn help us to continue providing safe, clean and reliable water service to our customers."

The project will replace 1,990 feet of aging pipe with 6-inch PVC main and 2-inch PVC main. The work will occur on Wilson Street, from Vance Street to Brown Street, and Harper Street, from Vance Street to Brown Street. Crews began work the week of November 2nd and the project is scheduled to be completed by the end of January. Final street restoration will be completed in spring 2027. Work will occur Monday through Friday between 7:30 a.m. and 5:00 p.m., and traffic restrictions will be in place for the duration of the project.

This infrastructure upgrade project is part of West Virginia American Water's plan to invest more than $129 million in ongoing infrastructure upgrades across the state in 2026, supporting the economic health of communities across the company's service area. Economic impact studies show that for every $1 million invested in water infrastructure, upwards of 10 jobs are generated throughout local economies.

Over the past decade, West Virginia American Water has invested over $805 million in infrastructure projects and capital upgrades to address aging infrastructure across the Mountain State, including more than 168 miles of new water main. To learn more about these ongoing investments, visit the company's interactive upgrade map.

During construction, customers may experience temporary service interruptions, discolored water, and/or lower than normal water pressure. Crews will work as quickly as possible to shorten the length of these temporary inconveniences. To report water related emergencies such as leaks, main breaks or other service disruptions, customers can submit a service request on the company's website.
